  - Malaise
  - Myalgia
  - Headache
  - Diarrhea, vomiting, abdominal pain
  - Unexplained hemorrhage

### **AND one or more of the following epidemiologic risk factors within the past 3 weeks before the onset of symptoms**

- Residence in—or travel to—an area where EVD transmission is active (see info below for W.H.O. or CDC for most current “Hot Zone” info) Currently Liberia, Sierra Leone, Guinea, and Nigeria
- Contact with blood or other body fluids of a patient known to have or suspected of having EVD
- Direct handling of bats, rodents, or primates from disease-endemic areas

Positive for signs/  
symptoms and at least one  
of the above risk factors?

No

You may stop  
screening for EVD

Yes

### Immediately:

- Place patient in private room and use Standard, Contact, and Droplet precautions. Limit the number of individuals interacting with the patient.
- Notify Disease Control at: (951) 358-5107 - After Hours: (951) 782-2974 and request to speak with the public health second call Duty Officer.
- Log names and contact info of everyone who has come into contact with the patient (ED staff, visitors, transport staff, etc.)

### Isolation

- Use Standard, Contact, and Droplet precautions
- Single patient room
- Door closed
- Identify a bathroom exclusively for patient's use. Post signage to exclude others from using
- Log names and contact info of everyone who has come into contact with the patient

### Personal Protective Equipment (PPE)

- Gloves (double gloving)
- Gown (fluid resistant or impermeable)
- Eye protection (goggles or face shield, disposable)
- Facemask (disposable)
- Shoe covers (disposable)
- Leg coverings (disposable)

End
